

Two reasons I find time to *Prevent Diabetes* ...my future and theirs.

**My family means the world to me.
That's why I'm making time to take care of my health.**

I found out that having a family history of type 2 diabetes puts you at risk for the disease. But the good news is that you can prevent it. Take these small steps: lose a small amount of weight by making healthy food choices and getting 30 minutes of physical activity 5 days a week.

Talk to your health care professional about your risk for type 2 diabetes.

**For free information about preventing
type 2 diabetes, visit www.YourDiabetesInfo.org
or call 1-888-693-NDEP (6337);
TTY: 1-866-569-1162.**
